This report presents the 2004 Wisconsin Youth Tobacco Survey (YTS) data for public middle school youth in grades 6, 7, and 8. The data are shown in table format, by question, response options, and answers.

The Wisconsin Youth Tobacco Survey (YTS) is a comprehensive measure of youth awareness, attitudes and related behaviors about tobacco use in Wisconsin. The purpose of this survey is to monitor these attitudes and behaviors to assist in improving youth programs and initiatives.

The Wisconsin YTS provides a comprehensive data set and the ability to make valid statewide estimates about tobacco use, awareness, attitudes and behaviors among the Wisconsin's public middle and high school student population.

Forty-three of 50 (86.0%) randomly selected middle schools participated in the 2004 Wisconsin Youth Tobacco Survey. In the participating schools, 1,682 of the 1,892 sampled students (88.9%) completed usable questionnaires. This gave an overall response rate of 76.5% for all potentially eligible students in the original 50 eligible schools.

PAGE 3

WI YOUTH TOBACCO SURVEY, MIDDLE SCHOOL: 2004 QUESTIONS AND RESPONSES

The data from the 2004 Wisconsin YTS are presented in a table format by question. The questions are listed in the order as they appeared on the survey.

The “missing” variable under the response options is for those youth who completed the survey, but for whatever reason, did not answer that particular question. The “unweighted frequency” is the number of students who answered the particular response to that specific question. This is sometimes referred to as the “raw” number. The numbers in this column add up to 1,682 (the number of participants) for each question. The “weighted frequency” statistically adjusts the “unweighted frequency” using several variables including, but not limited to, grade and gender, to reduce bias in the sample and make the data more representative of all public middle school youth in Wisconsin. This is shown as a percent of all public middle school youth in Wisconsin, not just the youth that participated in the survey.

Funding

The 2004 Wisconsin YTS was funded by the Department of Health and Family Services’ Tobacco Prevention and Control Program. Through a comprehensive tobacco prevention and control program, the Department is committed to reducing youth tobacco use.

Disclaimer

This report contains only data from the 2004 Wisconsin YTS. As such, it has potentially strong limitations in regards to tracking of trends in perceptions, attitudes and behaviors by middle school youth. The data within the 2004 report can be compared to previous YTS data, however, conclusions made regarding differences in trends requires further analysis. Nevertheless, the data should help provide an understanding of the influences toward smoking behavior and attitudes on smoking in the middle school years and how best to devise strategies to prevent and/or reduce use.

The data will also be used in conjunction with other local and national data that explore similar topics.

Department of Health and Family Services’ Tobacco Prevention and Control Program

The DHFS’ Tobacco Prevention and Control Program, located within the Bureau of Community Health Promotion, Division of Public Health, is committed to reducing tobacco usage in Wisconsin. The Program, in collaboration with Wisconsin local health departments and other community organizations active in tobacco control, works towards the following goals:

- ❖ **Eliminate Exposure to Environmental Tobacco Smoke**
- ❖ **Reduce Smoking Initiation among Youth**
- ❖ **Promote Quitting among Adults and Young People**
- ❖ **Identify and Eliminate Health Disparities Among Population Groups**

Acknowledgements

Many persons contributed to the 2004 Wisconsin YTS. Special thanks are due to all the participating students, teachers and principals, as well as the following organizations and entities:

- University of Wisconsin Comprehensive Cancer Center, University of Wisconsin Medical School
- Wisconsin Department of Public Instruction
- Tobacco control and prevention advocates
- Community coalitions

Wisconsin Department of Health and Family Services
2004 Wisconsin Youth Tobacco Survey (YTS)
Middle School Fact Sheet

The Wisconsin YTS is a comprehensive measure of youth awareness, attitudes, and related behaviors about tobacco use. The purpose of this survey is to monitor trends of these attitudes and behaviors to assist in improving youth programs and initiatives. The 2004 Wisconsin YTS was funded by the Department of Health and Family Services' Tobacco Prevention and Control Program.

The Wisconsin YTS is a school-based survey of students in grades 6-8, conducted every spring semester of the academic year beginning in 1999-2000. Fifty schools were randomly selected in 2004 to participate in this survey. Classrooms in the selected schools were also randomly selected. All students in the selected classes were eligible to participate. The overall middle school response rate for the 2004 YTS was 75.6%. A total of 1,682 public middle schools students in 43 middle schools participated in the Wisconsin YTS in 2004.

Prevalence

- 39% of students have used a tobacco product in their lifetime (6th grade=32%, 7th grade=37%, 8th grade=47%)
- 29% have smoked cigarettes in their lifetime (6th grade=18%, 7th grade=28%, 8th grade=41%)
- 13% currently use any tobacco product (Male=15%, Female=11%)
- 7.7% currently smoke cigarettes (6th grade=3.2%, 7th grade=6.7%, 8th grade=12.2%)
- 2.2% currently use smokeless tobacco or chew (Male=2.9%, Female=1.5%)

Environmental Tobacco Smoke (ETS)

- 45% live in homes where others smoke
- 55% are in the same room as others who smoke during the week
- 92% think that smoke from other people's cigarettes is harmful to them

Cessation – Current Smokers

- 51% want to stop smoking
- 52% attempted to quit smoking during the past 12 months

Media

- 78% have seen or heard commercials about the dangers of cigarette smoking within the past 30 days
- 55% have seen or heard anti-smoking ads that talk about "Crazyworld"

School

- 66% were taught in class about the dangers of tobacco use
- 3.1% smoked on school property in the past month

Community

- 12% participated in a community event to discourage tobacco use

Access and Availability – Current Smoker < 18 years old

- 6% buy cigarettes in a store
- 24% gave money to someone else to buy the cigarettes during the past 30 days

Middle School Highlights

- 7.7% of public middle school youth are current cigarette smokers.
- 39% have used a tobacco product in their lifetime.
- 29% of public middle school students have tried smoking cigarettes.
- Current smokeless tobacco use has remained relatively the same over the past four years at 2.2%.
- ETS exposure is high – more than 5 in 10 students were in the same room with smokers during the past week.
- Over half of current smokers want to stop smoking.
- Almost 8 out of 10 students saw anti-smoking media messages in the past month.
- More than 6 out of 10 students were taught about the dangers of tobacco in class.
